

Dr. Jerry Scheidbach

## Brain Massage®: Show No. 966

2023 Retrospective and 2024 Prospective from the Brain Masseur

Original Air Date: 12.30.23

Segment.01 Hello. I'm Dr. Jerry Scheidbach, pastor of the Lighthouse Baptist Church in Santa Maria, CA—and your brain masseur—get ready for your brain massage.

Happy New Year! The last show of this year. I'll offer a retrospective look at 2023 and a prospective look at 2024.

[TRUTH]

A 2023 retrospective. Many put together a list of “most significant events,” or “top stories” of the year and so on, and they are usually put forward as the TOP TEN. And what makes the list depends almost entirely upon the person creating it.

Britannica did it a bit differently, identifying what it considered the be the major news stories month to month: The year started with the death of the Pope — Benedict XVI and the setting of the Doomsday clock at 90 seconds to midnight — or DOOMSDAY! Feb. — Brady retires, again; an earthquake in Turkey and Syria killing 50,000 — made Gates giggle — I added that! [Ever hear that guy giggle and notice how often he giggles when talking about depopulation? It's weird! Watch this video compilation and tell me what you think.<sup>1</sup>] Anyway, Britannica goes on to list LeBron besting Kareem Abdul-Jabbar's scoring record — YAWN! Yeah, I know! Oh, and another earth griping event: 28 of Vermeer's paintings were displayed in Amsterdam, so! Now we are in March: Taylor Swift does a world tour — uh huh! And oh, here you go, very important event indeed: Donald Trump is indicted by a grand jury for falsifying records, that, it turned out, were not falsified. So!

<sup>1</sup> [https://www.youtube.com/watch?v=oFom\\_GvPKel](https://www.youtube.com/watch?v=oFom_GvPKel)

April: Finland joins NATO, totally destroying all the prophets who said NATO was the rising of the ten horned beast of Daniel's prophecy — surpassing it by, well Finland was the 31st member, so! SpaceX lost a rocket, one of 96 successful launches, so. Oh, and Harry Belafonte died — Daylight Came, and he went on home — I hope to Heaven, but I don't know! — anyway! Hollywood writer's strike, India passes China as the most populous country in the world (and China is in serious trouble for meddling with nature and trying to control population by government controlling how many children a family can have — seriously, China is facing a major crisis in that regard. A new vaccine is approved to treat respiratory syncytial virus — viral infection of the respiratory tissue of the lungs, I guess. King Charles III was crowned — replacing Queen Elizabeth II, who died in 2022. Tina Turner died, Cormac McCarthy died — the Titan submarine imploded — that was a bizarre episode; oh, and affirmative action ended — -[but its influence continues in meritless promotions based on skin color or gender identification] — we are in July now, let's see, Oppenheimer and Barbie are released, are big hits, but don't come close to recovering the movie industry from the most abysmal year in movie making history and Americans flock to see Top GUN but flee all the Queer propaganda being pushed on them — Twitter get rebranded as X, Maui burns, no mention of the scandal following the LAHAINA FIRES; Spain's women's team wins Women's World Cup, I can't find whether tranny Palacios was on that team — Lybya flooded, it got hotter, we passed a mass shooting milestone — all time high [it's like as gun control increases, so do mass shootings], Hamas murders Jewish babies and starts war with Israel, Australia defeats India in Cricket match for the world cup, Rosalynn Carter dies, Iceland hit by a series of 700 earthquakes, Kissinger dies, ChatGPT gets an update, preparing for the 2024 election? — and finally Beyonce film is released to disappointing box office

response,<sup>2</sup> and Britannica's retrospective ends with the death of Sandra Day O'Connor.<sup>3</sup>

Now, if you ask the Council on Foreign Relations, they'll count them down as follows: 10 — global recession continues; 9 — space race heats up; 8 — India passes China in population contest; 7 — Azerbaijan seizes Nagorno-Karabakh; 6 — Civil war wracks Sudan; 5 — AI offers promise and peril; 4 — US China tensions continue to simmer [I would say begin to boil]; 3 — Ukraine's counteroffensive gains little ground at a heavy cost [I would say the Obama-nation alliance with Putin begins receiving its payoff]; 2 — Hamas attacks Israel [I would say beheading 11 Jewish babies and launching 2500 rockets into Israel was a heinous act of terrorism without regard to any question about whether Israel "secretly allowed it" — and no. 1 — Global temperatures shatter records [which they say began in 1880 but in the current context of concern, actually it began in 1951 with a whole lot of wriggle room for fudging — and they pretend from this to extrapolate from this an accurate understanding of global temperature change over 125,000 years when they can't even establish an existence of the earth beyond something in the range of 10,000 years] — I'm just saying! Climate change is observable, and evidence supports the conclusion that it is cyclical — the idea that too many people breathing is causing it is ludicrous, and the notion we must reduce of CO2 levels is actually dangerous to life on this planet! Just saying!

In GOD I TRUST, not Fauci style manipulation of science. We've all seen how that works.

---

<sup>2</sup> 966.31.2-Beyoncé's 'Renaissance' Movie Falls Off Big at Box Office in Second Week <https://www.tmg.com/2023/12/10/beyonce-renaissance-movie-falls-drop-off-box-office-second-week/>

<sup>3</sup> <https://www.britannica.com/topic/2023-The-Year-in-Review>

Anyway — here is the TOP TEN from “The TOP TENS” — hehe. 1, — the Super Mario Bros. Movie; 2 — Twitter becomes X; 3 — the Barbenheimer Phenomenon [the surprise that movies talking about normal stuff is more interesting to movie goers than WOKE propaganda movies] — 4 — The Ukraine War drags on; 5 — the Titan Sub incident; 6 — Turkey/Syria Earthquake; 7 — an earthquake of another kind, The US speaker of the House fiasco that ended with a “CHRISTIAN NATIONALIST” holding the gavel — that’s my take; 8 — remake of All Quiet on the Western Front — a poke at the Ukraine war?; 9 — Pope Benedict’s funeral; and 10 — the burning of Maui.

Okay, so, Britannica did a chronological retrospective, the Globalist Council of Foreign Relations offered theirs, and the Top TENS site offered theirs. And you see what I mean — it depends on your beginning point of view, or your premise bias. Here is another top ten arrangement by Forbes called “the top ten biggest stories of 2023.”<sup>4</sup> It looks like this.

1 — The National Ignition Facility (NIF) has repeated a nuclear fusion reaction resulting in a net positive energy field. [This made my list too. This is huge—fusion power is a game changer and we’ve never been close enough to begin thinking what a game changer it WILL BE!; 2 — The US faces a rising threat of widespread civil unrest — another one that made my list. By the way, I made my list BEFORE I looked at any other retrospectives. Just thought you should know that! 3 — The climate crisis continues to force citizens of the Global South to march northward. [Well, that’s interesting because Forbes did not assume anything about the issues causing the climate fluctuations. Let’s see, well, actually, in their summary they postulate it would be better to over-invest in green tech than to ignore the possibility of real climate change diaster.

---

<sup>4</sup> <https://www.forbes.com/sites/devpatnaik/2023/12/10/the-10-biggest-stories-of-2023-that-say-the-future-is-here/?sh=d967af53e589>

I'd have to look more deeply into this to say whether I agree the migration is driven by climate change. 4 — Quantum computers took a big step towards commercialization. I'm still trying to get my head around quantum mechanics and how this works in computer technology. I'll have to get back to you on this one. Not sure I'd add this to my list. We'll see. 5 — Universal basic income is being rolled out, and, it seems surprising to Forbes that this is happening in RED STATES. Well, that surprises me too. Maybe I should consider this for my list; it is certainly a marker for movement toward globalization and it is remarkable that it's being embraced by our more conservative States - such as Alabama, Florida. Hmmm. 6 — The first gene-editing technology has been approved for treating life-threatening diseases. Yeah, well, I knew this was something we have been doing for a while, but I did not know CRISPR had produced results now approved as treatment in medicine — hmmm. That's another good one, Forbes! Very interesting! 7 — Global population growth is expected to grind to a halt by 2050. Really? This is interesting; Forbes reveals that governments around the world, such as China, are investing billions to reverse the declining birthrate — this will not make Gates giggle! Forbes even predicts upcoming BANS ON ABORTION to turn the tide on decreasing population. Very interesting! 8 — The CDC issued a warning that an antimicrobial-resistant fungus is an “urgent threat.” It's called Candida Auris and spreads easily in healthcare settings! Wow! As if we did not already have enough reason to avoid “healthcare settings” after the Fauci COVID plandemic killing protocols — I remember when I visited Russia back in the early nineties it was universally assumed the only reason to go to the hospital was in order to die! 9 — Weight-management drugs are hurting consumer demand across multiple categories. What's this? “Retailers and Banks are warning that the use of drugs like Ozempic will bring down demand for junk food, medical devices, and MAYBE EVEN FURNITURE, BEER, AND TOBACCO.” Are

you kidding me? Is that way CA has banned use of some weight loss drugs here — some that actually serve very well to control type two diabetes issues? How about that Sarah —? Interesting! Okay, now number 10 — AI is still coming for your white collar job. GPT-4 scored higher than 90% of humans on the bar exam. Soon you won't need lawyers? YOU JUST PUT YOUR LEGAL QUESTION TO A COMPUTER and everything gets done, including whatever court filing you need?

Well, Looks like I've used up my time in this segment, so I'll lay out my 2023 retrospective and my 2024 prospective after the break. Hold on. I'll be right back!

Segment.02 Hello. Welcome back! I'm Dr. Jerry Scheidbach, pastor at the Lighthouse, your brain masseur, and Paul Revere's lantern lighter, lighting the lamps in the church belfry arch, signaling the enemy is on the march, an enemy that would steal from us our liberty.

All right! So what's the Brain Masseur's retrospective on 2023? How closely does it line up with yours?

I arranged my list in categories — what I regard as the MOST SIGNIFICANT developments of 2023 in 7 categories. So they are not ordered in a hierarchical arrangement — that is, it's not a scale thing, 1-10, 1 being most significant. Not even the categories are arranged in that way — consider each equally important — it's about how they interrelate more than anything else, and that's something I probably won't get to talk to in the radio/podcast because of time limitations. But, Lord willing, I'll address that intriguing insight during our Brain Massage® LIVE video visit this Saturday night, ~9PM on RUMBLE, my personal and the church FB pages, and TWITTER. If you want the link to join in, go to [brainmassage.net](http://brainmassage.net) and subscribe. I'll add your email address to the list of persons who receive my notification with the various links where you can join us!

Here we go!

MEDICINE: I think the most significant medical development in 2023 was the government being forced to back off the mandates, and how the resistance to these mandates is being felt throughout the country making these wicked tyrants hesitant to try it again. Vaccinations have dropped off precipitously, only a few die hard macaroons still go about with their masks — you've probably noticed a time or two when the medical establishment does a trial run hinting at a return of the mask mandates, and a few people run about in masks — but have you noticed, it's only a few and it starts dying off very quickly.

We have a lot of work yet to do to bring these yahoos, like Fauci and friends, to JUSTICE for their CRIMES AGAINST HUMANITY, but great strides are being achieved toward that end.

So the acceleration of erosion of public confidence in the medical establishment is a featured development for 2023.

BUSINESS: I think we have hit a turning point in the disturbing trend of FASCISM in America. The union of big corporations and Government is beginning to provoke some serious push-back. Americans are beginning to demand CHINA get OUT of our FARMING BUSINESS, and CHINA is being called out with our BORDER crisis — people are beginning to SLAP businesses that push the government's globalist agenda to destroy the FAMILY, and unravel the basic natural order of social structure around male and female distinctions — Mulvany almost broke Budweiser, WOKEism has hobbled Disney — Trump's warning, go woke, go broke, is becoming a fulfilled prophecy repeatedly — and while they keep trying, they keep failing!

THE MOST SIGNIFICANT DEVELOPMENTS IN GOVERNMENT, or POLITICS — the relentless persecution of TRUMP, while difficult to watch, and disturbing, indeed, infuriating — all it's doing is steeling the resolve of his base and

galvanizing increasing numbers of Americans behind him — increasingly, AMERICANS are seeing Trump as a representative of themselves — his assessment that they (the deep state tyrannical traitors polarized around protecting BIG GOVERNMENT) are not really targeting TRUMP, but his followers — every American who subscribes to the proposition that AMERICA as FOUNDED must be preserved, WE WANT OUR COUNTRY BACK — we can see that Trump is right — they have taken America away from we the people, and IT'S TIME WE TAKE IT BACK. Great strides have been made in restoring THE PEOPLE'S RIGHT OF CONSENT — that is, ELECTION integrity, and the ascension of Mike Johnson to the Speakership is a very significant signal of the direction GOD is taking in all of this!

THE MOST SIGNIFICANT DEVELOPMENTS in science — I am very excited about the advances made in fusion technology — that's like capturing and directing the energy of the SUN — it has huge implications for advancing the quality of life for every one on the planet; and the advances in space technology points to a future that includes developing colonies on other planets — and expanding other energy resources — current advances in space exploration and the fact that it's privatized, is very exciting me! Way to go Musk.

Now, I think I'll add advances in quantum mechanics — although I think the idea that two physical things can occupy two or more different places simultaneously is a stretch — I do think it's possible something could move with such speed as to make that a practical reality.

THE MOST SIGNIFICANT SOCIAL DEVELOPMENT is without doubt the transition of Twitter into the hands of Elon Musk and the rise of X. This corresponds to the ongoing implosion of WOKE nonsense — and the disintegration of Legacy Media!

THE MOST SIGNIFICANT SOCIAL CONSCIOUSNESS DEVELOPMENTS in 2023 are reflected in the general acceptance and exposure of Americans to SOUND OF FREEDOM, 2000 Mules and WHAT IS A WOMAN. These are being followed by other hugely impactful documentaries raising a general consciousness to the fact that EVIL has captured our institutions but has not corrupted the heart of the general American public. There is salt and light remaining — it's true that “my people are destroyed for lack of knowledge” — so 2023 has been a great year for getting the needed knowledge to the PEOPLE.

Finally, I think the most significant development religiously is the rising awareness that JESUS CHRIST IS NOW THE KING OF HEAVEN AND OF EARTH — the synthesis of Reformed and Dispensational eschatology represented in my book, GOD'S WAR, is beginning a discussion that will revolutionize the Lord's Bible based CHURCHES in CA and in America. The RISE of the CHRISTIAN ARMY of CHRIST'S SOLDIERS swinging the SWORD OF THE SPIRIT delivering the REPROOF of the SPIRIT upon the WORLD for sin, righteousness, and judgment, is beginning to take hold.

I'll have to address more on this during my Brain Massage® LIVE video visit Saturday night. I remind you to visit my webpage, [brainmassage.net](http://brainmassage.net), click the SUBSCRIBE (FREE) link in the menu bar and answer two questions, your name, and the email address you want us to use to contact you — you'll get the Brain Massage radio/podcast delivered to your inbox every Friday night after it is posted, and you'll get notified when I go live with links to join my livestream.

HERE ARE my FIVE PROJECTIONS for 2024:

1. The RIGHT of the PEOPLE to EXPRESS THEIR CONSENT to government will be restored sufficiently to prevail in the upcoming election — and I believe Trump will be returned to

OFFICE as a huge REBUKE to the DEEP STATE GLOBALISTS and UTTER REJECTION of WOKE nonsense.

2. I believe the ideologies of collectivism, fascism and Marxism will be defeated by the proponents of individual rights and responsibilities — I believe Christian Patriotism will triumph over Godless, Marxist Communism in America. I believe TRUTH will triumph over the LIE.
3. I believe Nimrod's latest effort to complete his tower will fail — that the artifacts supporting the advances of Globalism will be dismantled, that nationalism will prevail over globalism, that decentralization or diffusion of power will triumph over centralization of power — but that, HOWEVER...
4. This will not happen without significant turmoil: that the forces of globalization, centralization, will go to extreme, and extraordinary lengths to protect their LIES — they will stop at nothing, and will attempt to throw us into full blown CIVIL WAR, but I think TRUTH and RIGHT will prevail, and that we can and should hope and work to avert this.
5. Finally, I think there will be multiple attempts on President Trump's life, and I predict that in the period from his victory in the polls in November of 2024 to his inauguration in January of 2025, they will attempt to instigate massive unrest across the land and make an all out and open effort to assassinate Trump. But I believe this will fail!

So that's my 2023 retrospective and my 2024 prospective. What do you think?

I have lit the lamps in the Church belfry arch and now you let me know if you see them.
